RECYCLING & DISPOSAL

Disposal instructions for old products:

The WEEE directive (Waste Electrical and Electronic Equipment 2002/96/EC) has been put in to place to ensure that products are recycled using best available treatment, recovery and recycling techniques to ensure human health and high environmental protection

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused. This product may also contain substances that can be hazardous to the environment if not disposed of properly.

Do not dispose of your old product in your general household waste bin. Electrical and electronic equipment should never be disposed of with general household waste, but must be separately collected for their proper treatment and recovery.

Please make yourself aware of the local separate collection system for electrical and electronic products marked with this symbol:
The crossed-out bin symbol, placed on the product, reminds you of the need to dispose of the product correctly at the end of its life.

Use of the following disposal options:

1. Dispose of the complete product (including its cables, plugs and accessories) in the designated WEEE collection facilities.
2. At the end of the life of your product please contact our Weee compliance scheme (WeeeCare) for more details on collection arrangement on: 0844 800 2004 and quote of account number: 135440.
3. If you purchase a replacement product, hand your complete old product back to the retailer. They should accept it as required by the WEEE directive

Where possible recycle your packaging.

With your help it is possible to reduce the amount of electrical and electronic waste ending up in landfill and to improve quality of life preventing the release of potentially hazardous substances into the environment.
